

25 March 1967.

Mr. Harold Weisberg,
Hyattstown, Maryland. 20734

Dear Mr. Weisberg:-

Thought you might be interested in this letter to Mr. Ramsey Clark.
Isn't this positive proof that one man could not have got off the
three shots, from a bolt-action rifle, in that space of time?

Remember, too, that
Oswald was LEFT-HANDED.

21 March 1967.

Honorable Ramsey Clark,
The White House,
Washington.

G. NORMAN ALBREE
7 Stratford Road
Winchester, Massachusetts

Dear Mr. Clark:

" 4.8 - 5.6 Seconds"
" 4.6 - 4.6 Seconds
" 0.2 1.0 SECOND.

- " The Warren Report states that this is the "Time Span of the Shots" - three.
- " The Warren Report states that the minimum time required to operate the bolt of the Garand Rifle is "2.3 Seconds" - for three shots the bolt must be operated twice and, hence, 4.6 seconds are required.
- " There remains, therefore, from 0.2 second to exactly 1.0 second for the riflemen to 'get back on target' twice which, manifestly, is a physical impossibility.

It is respectfully requested that this letter together with that of 11 March 1967 - or copies thereof - be placed with my other documents pertaining to the assassination of President Kennedy in the National Archives.

Cordially,

G. N. Albree
